

The Print Source is excited to announce that we are now an ITAR (International Traffic in Arms Regulations) registered business. ITAR is a set of United States government regulations that control the import and export of specific defense-related materials and services. Its goal is to safeguard U.S. national security and further U.S. foreign policy objectives.

ITAR regulations dictate that information and material pertaining to defense and military related technologies can only be shared with U.S. Persons and organizations unless authorization from the Department of State is received, or a special exemption is used.

What does this mean to you, our customer? You can relax, knowing that we will protect your information, product, trade secret or project. To that end, all visitors to our facility must check in at the front desk. Those who need to visit a restricted area of the facility will be escorted.

Vendors or service providers who come by often may choose to fill out an application to get clearance to be in our facility without an escort.
